

# Neptune CPP

## Propulsion Control System

Neptune propulsion control system offers flexibility and accuracy for shipowners worldwide.

When choosing a Neptune CPP system you will get:

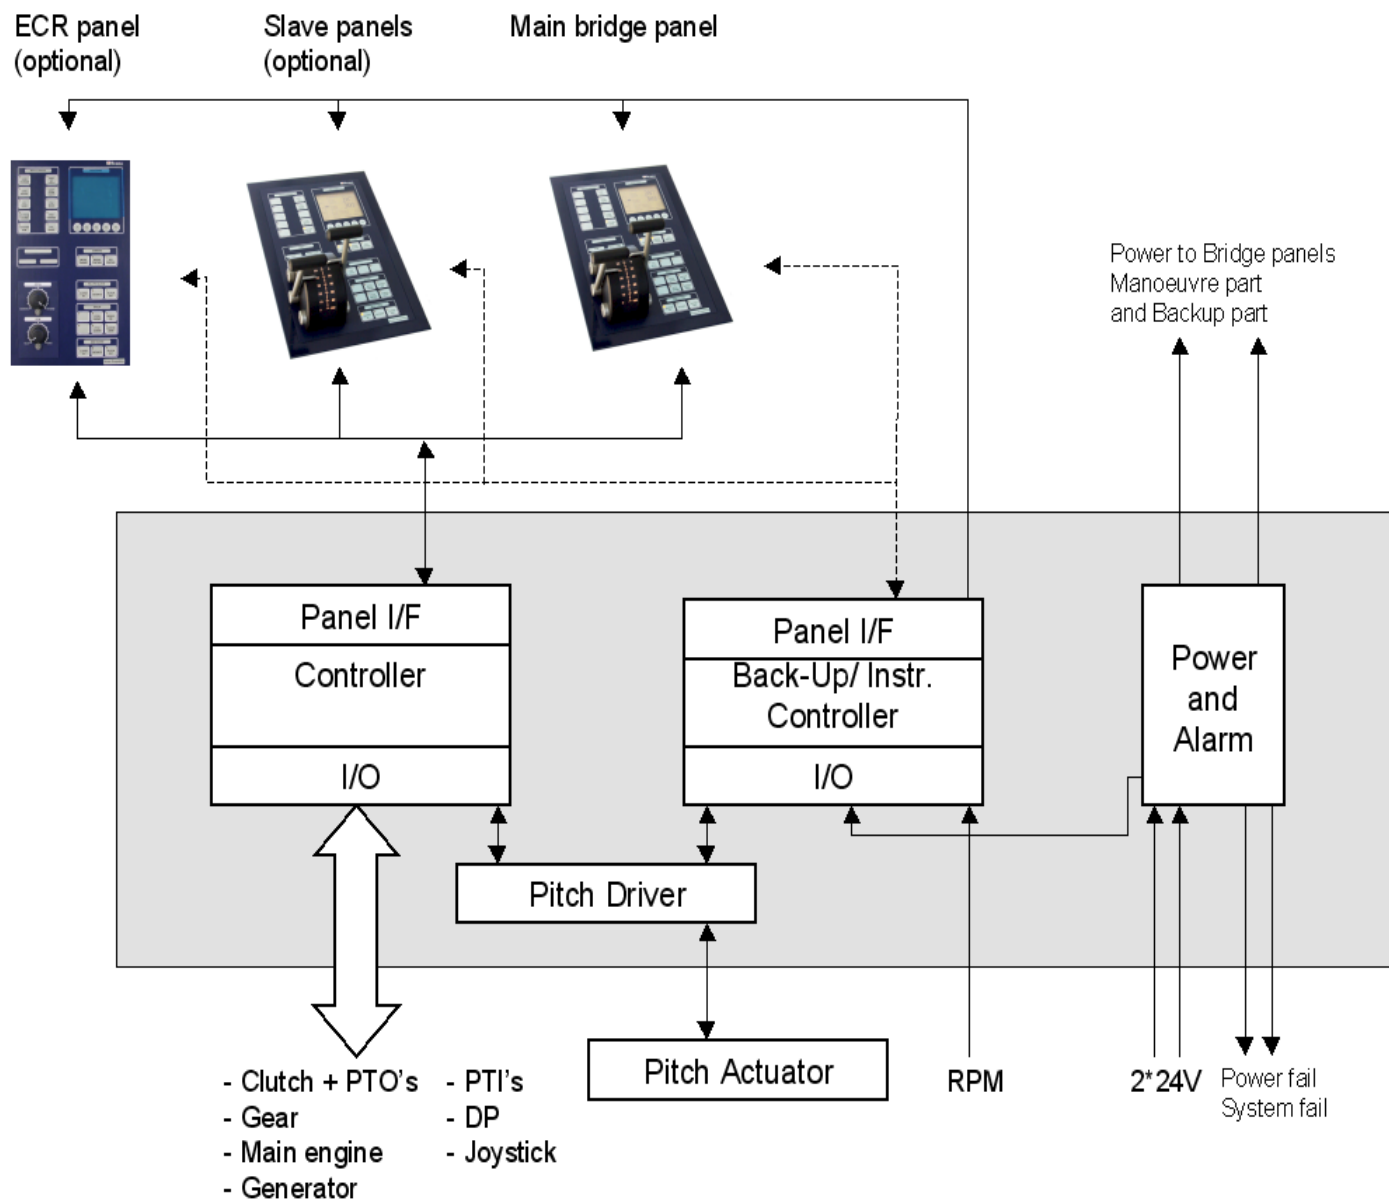

- Fully flexible system to be designed for your specifications.
- Control of pitch, RPM and clutches (incl. Boost, PTI, PTO)
- Protection - Safety - Monitoring
- Interface for Joystick and DP.
- Designed with focus on installation, commissioning and life cycle cost.

Neptune CPP is built with a reference of 25 years of knowledge with almost all kind of engines and gear-propeller systems. It is designed to suit any demand from the modern fleet. Neptune CPP is the perfect alternative for both newbuildings and retrofit.
